CONDENSERS  
AC COMPRESSORS  
EVAPORATORS  
RECEIVER DRYERS  
HEATERS  
AC FANS

New products and new product features available in Nissens' Climate range for 2014:

- **170 new products added to the range** covering more than 370 OE numbers
- **400+ condensers with dryers** integrated or included in the box

- **More First Fit products** with all additional parts needed for a quick and proper installation included in the box

**Condensers** with o-rings

**AC compressors** with o-rings, prefilled with PAG oil and delivered with electrical adaptor and pre-filter, when needed

- **More protection to ensure even higher product durability**

This season, we increase the number of corrosion protected condensers - a feature that prolongs the product life span

- Selected AC compressors equipped with pre-filters, to be installed in the suction line to prevent any impurities getting inside

## The widest range in the aftermarket: Nissens adds more products and new features to the wide range of climate parts

We follow launches and developments from OE manufacturers closely to ensure that we are always able to offer a strong product alternative in compliance with the OE standards in the market.

This year, more than 170 new AC products have been added to the Nissens' climate product range, covering more than 370 OE numbers.

Additionally, for the AC season 2014, we expand the range of First Fit products. Now, First Fit is also available on a selection of Nissens' condensers – meaning that condensers covering more than 120 OE numbers are now equipped with o-rings in relevant sizes and quantities.

Furthermore, the First Fit Concept has become even wider when it comes to Nissens' compressor category. First Fit features for Nissens' AC compressors imply that Nissens supplies the AC compressors with the required viscosity lubricant, PAG oil, o-rings, electrical adaptors, if needed, and, as a new feature, pre-filters will be offered for selected models in order to offer system protection against impurities that may cause damages to the compressor and other system parts.
