Guidance for replacement of Guide Pins

Please note that some Meritor calipers fitted to Scania applications have a special guide pin arrangement that uses a number of hardened steel balls to provide anti-rotation protection. For aftermarket replacement and service of the guide pins, these balls are not required, therefore Guide Pin Kit MCK1323 contains standard guide pins without the anti-rotation feature.

Please always refer to Meritor Maintenance Manual MM-0350 when servicing, repairing or replacing Meritor ELSA225 calipers.
